

ACTIVE TOOLING LIMITED

Precision Tooling Engineers

7th May 2015

I first contacted Mike in March 2015 with a view to passing my full motorcycle licence via the direct access guaranteed pass course that Mike offers.

Being 56 years old and never having been on a motorcycle before, I anxiously booked in for the CBT course with Mike on the 600cc motorcycle.

I soon found that with Mike's many years instructor experience I quickly overcame my initial anxieties and after many laps of the practise yard followed by an on the road assessment, I passed the test 15th March 2015; from there I soon passed the theory and hazard perception test.

My training continued and included a number of 2 to 3hr rides, together with attending Mod 1 and Mod 2 tests with other riders, all very good experience and an insight as to what lay ahead. Mike offered me a Mod 1 practice session at the test centre which I found to be invaluable and two days later I passed my Mod 1 first time, which was very encouraging. I had a couple more rides out with Mike and he felt confident in my ability to put me in for my Mod 2 which I am proud to say I managed to pass first time.

I am now enjoying my motorcycle and would like to thank Mike for his expert tuition and patience that without doubt, played a large part in me gaining my full licence in a relatively short time after never having ridden before.

I have now booked the enhanced riders course with Mike to gain more experience and further improve my riding skills with his expert guidance.

Thanks Mike and best regards,

Dave Greaves
